

Millennium Solo Technical Specification

Please note the following specifications are intended as a guideline only, and are recommended minimum specifications. Our software may run on a lower specification but performance might be affected. We do not provide support for systems with a lower specification than that shown below. We recommend upgrading operating systems regularly to utilise the most recently available service packs.

Item	Millennium Solo
WORKSTATIONS	Standalone PC
Processor (CPU)	Pentium III 500MHz
Memory (RAM)	512Mb min.
Disk Space	500Mb min.
Display Resolution	Min. 800 x 600 with 256 colours, 1024 x 768 recommended
Backup Device	ZIP or Tape Drive (100Mb min.) CD-RW drive not recommended for daily backup.
Operating System	MS Windows 2000, XP Pro/Home, Vista Home or higher. We do not recommend Win 98 or ME.
Remote Access	56k Modem and PCAnywhere (V10 minimum) recommended for remote support, or our Netviewer remote support with ADSL connection.

The image shows the software box for 'Millennium Solo' by OPSIS Practice Management Solutions. The box is primarily green and white. It features the OPSIS logo at the top left, the product name 'Millennium Solo' in a large green font, and a subtitle 'Accounts & Time Recording package specifically designed for the sole practitioner'. The background of the box art includes a pair of glasses and a computer mouse.
